Preface	19
Part 1. Animal hygiene for a more sustainable animal production	
The growing role of animal hygiene for sustainable husbandry systems	23
<i>Th. Blaha and J. Köfer</i>	
Abstract	23
1. Introduction	23
2. The changes	25
3. Veterinary medicine	25
4. The consequences	26
5. Animal hygiene's contribution to animal health	27
6. Animal health and animal welfare improvements	27
7. Food safety at herd level (pre-harvest food safety)	28
8. Environmental protection and waste management	29
9. The most important principles and tools	29
10. Conclusion	31
References	32
The role of the European feed industry in a sustainable feed and food safety strategy	33
<i>M.J.M. Tielen</i>	
Abstract	33
1. Introduction	34
2. Safe feed production: a daily challenge for the feed industry	34
3. Safety of genetically modified organisms (GMOs) in animal feed	40
4. Feed legislation embracing the overall feed chain	41
5. Compound feed producers response: the development of a European Feed Manufacturers Code (EFMC)	42
6. Concluding remarks	43
References	44
New trends in farm animal welfare: science values and practice	45
<i>J. Webster</i>	
Abstract	45
1. Introduction	45
2. Sentience, welfare and wellbeing	46
3. Stress and suffering	46
4. Trends in animal welfare science	48
5. Ethics and values	50
6. Right action: promotion of animal welfare	51
7. Welfare-based quality assurance	52
References	54

Impact of human-animal interactions on the health, productivity and welfare of farm animals	57
<i>P.H. Hemsworth</i>	
Abstract	57
1. Introduction	57
2. Laboratory studies on the effects of handling on animal fear, stress, productivity and health	58
3. On-farm relationships between handling and animal fear, stress, productivity and health	60
4. Effects of fear of humans on animal welfare	61
5. Reducing fear in farm animals	61
6. Conclusion	63
References	64
New challenges to protect health and food quality when managing manures from intensive animal production	69
<i>C.H. Burton</i>	
Abstract	69
1. Introduction	69
2. The consequences of intensive livestock farming	70
3. Treatment conditions to reduce pathogen numbers	73
4. Treatment techniques for the reduction of pathogen presence in livestock wastes	75
5. Processes based on the effect of raised temperatures	77
6. Conclusions	80
References	81
Part 2. Impact of the environment on cattle behaviour, health and performance	
Health, fertility and welfare in genetically high producing dairy cows	87
<i>P.A. Ottenacu</i>	
Abstract	87
1. Introduction	87
2. High milk production and its undesirable consequences	87
3. Practical implications	93
4. Conclusions	96
References	96
Environmental stress and reproduction in dairy cows	99
<i>H. Dobson</i>	
Abstract	99
1. Introduction	99
2. The problems	99
3. Mechanism behind the problems	102
4. The solutions	103
References	104

Effect of housing systems on dairy cow hygiene and udder health	107
<i>K. O'Driscoll</i>	
Abstract	107
1. Introduction	107
2. Causative agents	108
3. Indicators of udder health status	109
4. Factors influencing udder health	111
5. Conclusion	115
References	116
Walkway floor design, feed stalls, claw lesions and locomotion in Swedish cubicle-housed dairy cattle	121
<i>J. Hultgren, E. Telezhenko, M. Ventorp and C. Bergsten</i>	
Abstract	121
1. Introduction	121
2. Material and methods	123
3. Results	127
4. Discussion	130
5. Conclusions	131
Acknowledgements	131
References	131
Claw diseases as a factor for changes in dairy cows' behaviour and milk production	135
<i>A. Pavlenko, L. Lidfors, C. Bergsten, A. Aland and D. Arney</i>	
Abstract	135
1. Introduction	135
2. Lameness	136
3. Digital dermatitis	137
4. Sole ulcer	138
5. Claw diseases, lameness and behaviour	139
6. Claw diseases, lameness and milk production	143
7. Control and prevention of claw diseases	143
8. Conclusions and recommendations	144
Acknowledgements	145
References	145
Herd health management and quality risk control on large dairy farms	149
<i>J.P.T.M. Noordhuizen, J.S.C. Boersema and J. Cannas da Silva</i>	
Abstract	149
1. Introduction	149
2. Professionally executed HHM programmes	150
3. HACCP-based Quality Risk Control (QRC)	153
4. Discussion	158
References	159

Influence of milk feeding methods on the welfare of dairy calves	161
<i>L. Lidfors, J. Loberg, P.P. Nielsen and M.B. Jensen</i>	
Abstract	161
1. The problem	161
2. Raising calves on the dam or foster cows	163
3. Rearing calves in small groups and feeding them via teat buckets	165
4. Rearing calves by feeding them via computer controlled milk feeders	166
5. Conclusions	168
Acknowledgements	168
References	168

Impact on and demands for health and welfare of range beef cattle in Scandinavian conditions	173
--	-----

<i>I. Ekesbo</i>	
Abstract	173
1. Introduction	173
2. Material and methods	174
3. Results and discussion	176
4. Conclusions	184
References	184

Part 3. Impact of the environment on pig behaviour, health and performance

Attempts to quantify the health status of pig herds: developing and validating a Herd Health Score (HHS)	191
--	-----

<i>C.-Ph. Dickhaus, D. Meemken and T. Blaha</i>	
Abstract	191
1. Objective	191
2. Material and methods	192
3. The composition of the Herd Health Score (HHS)	192
4. Results	196
5. Comparison of the HHS to the clinical investigation	196
6. Discussion	198
References	200

On-farm evaluation of animal welfare in weaner and fattening pig units based on critical control points	203
---	-----

<i>E. von Borell and D. Schäffer</i>	
Abstract	203
1. Introduction	203
2. Materials and methods	204
3. Results	205
4. Discussion	209
5. Conclusions	210
References	211

Reproductive disorders in pigs: a review on the crucial role of the environment	215
<i>F. Madec</i>	
Abstract	215
1. Introduction	215
2. The major problems encountered in daily practice	216
3. The crucial role of the environment in maintaining a healthy urogenital tract and sow performance	222
4. From academic knowledge to practice: adopt a rationale	231
5. Conclusion	234
References	236
An overview of the impact of the environment on enzootic respiratory diseases in pigs	239
<i>C. Fablet</i>	
Abstract	239
1. Introduction	239
2. Environmental factors involved in herd contamination	240
3. Herd factors suspected to promote disease persistence	242
4. Conclusion and outlook	252
References	253
A review of the effect of feed-borne mycotoxins on pig health and reproduction	261
<i>T.K. Smith and G. Diaz-Llano</i>	
Abstract	261
1. Definition and classification of mycotoxins	261
2. Natural distribution of mycotoxins	262
3. Hepatic mycotoxicoses	262
4. Renal mycotoxicoses	264
5. Pulmonary mycotoxicoses	265
6. Mycotoxins that affect pig immunity	266
7. Effects of feed-borne mycotoxins on pig reproduction	267
8. Summary	269
References	269
Impact of the diet on digestive disorders of pigs, with special emphasis on proliferative enteropathy and swine dysentery	273
<i>J.R. Pluske and D.J. Hampson</i>	
Abstract	273
1. Introduction	273
2. Proliferative enteropathy (PE)	275
3. Swine dysentery	278
4. Conclusions	280
References	281

Controlling the concentrations of airborne pollutants in piggery buildings	285
<i>T.M. Banhazi, E. Currie, S. Reed, I-B. Lee and A.J.A. Aarnink</i>	
Abstract	285
1. Introduction	285
2. Effects of airborne pollutants on farm workers, livestock and the environment	289
3. Generally encountered indoor concentrations and suggested maximum limits	292
4. General comments on reduction methods	292
5. Proactive reduction methods: minimising the generation of airborne pollutants	296
6. Reactive reduction methods: dealing with existing problems	302
7. Conclusions	303
Acknowledgements	304
References	304

Part 4. Impact of the environment on poultry behaviour, health and performance

Laying hens in aviaries: development, legal and hygienic aspects	315
<i>J. Hartung, A. Briese and A.C. Springorum</i>	
Abstract	315
1. Introduction	315
2. Development and legal aspects	316
3. Characteristics of aviaries	317
4. Animal welfare, health and performance	320
5. Hygiene aspects	322
6. Conclusions	325
References	326
Challenges of the new requirements for welfare of laying hens housed in cages	329
<i>V. Michel and M. Guinebretière</i>	
Abstract	329
1. Introduction	329
2. Changes in regulations	330
3. Inter-relationships between housing, animal welfare, health and performances in furnished cages	332
4. Housing systems of laying hens: position of the different producer countries and egg trade	338
5. Conclusions and outlook	340
References	341
Controlling the concentrations of airborne particles in broiler buildings	347
<i>T.M. Banhazi, E. Currie, M. Quartararo and A.J.A. Aarnink</i>	
Abstract	347
1. Introduction	347
2. Effects of airborne pollutants on farm workers, livestock and the environment	348
3. General comments on reduction methods	350

4. Proactive reduction methods: minimising the generation of airborne particles	351
5. Reactive reduction methods: dealing with existing problems	354
6. Conclusions	357
Acknowledgements	358
References	358
The effect of the feed on the host-microflora interactions in poultry: an overview	365
<i>C. Burel and C. Valat</i>	
Abstract	365
1. Introduction	365
2. Description and location of the GI normal microflora of birds	366
3. Gut functions	368
4. Gut microflora regulation	370
5. Adverse microorganisms potentially present in the GI tract: enteric pathogens	370
6. Improve microflora balance: nutritional approaches to influence different bacterial control mechanisms	371
7. Competitive exclusion and probiotics	371
8. Prebiotics	373
9. Organic acids	374
10. Diet formulation, feed preparation	374
11. Exogenous enzymes	375
12. Nutritional influence on host-microflora interactions	376
13. Carbohydrates	376
14. Proteins	377
15. Lipids	377
16. Energy	377
17. Vitamins and minerals	378
18. Conclusion	378
References	379
Effect of lactic acid bacteria on broilers: from the farm to the processing plant	385
<i>M. Chemaly, P. Fravallo, G. Postollec, R. Maurice, E. Boscher, C. Houdayer, A. Labbé, G. Hervé, G. Gentilhomme, E. Boilletot, C. Brézillon, F. Quéré, A. Salmon and C. Burel</i>	
Abstract	385
1. Introduction	385
2. Materials and methods	386
3. Results	388
4. Discussion	391
References	393

Health and welfare in Swedish game bird rearing	395
<i>S. Wiberg and S. Gunnarsson</i>	
Abstract	395
1. Introduction	395
2. Material and methods	396
3. Results	397
4. Discussion	404
5. Conclusion	406
Acknowledgements	406
References	406
Part 5. The lessons for the future	
Precision livestock farming for animal health, welfare and production	411
<i>C.M. Wathes</i>	
Abstract	411
1. Introduction	411
2. The basic concepts of PLF	412
3. Lessons to be learnt from current applications of PLF	413
4. The electronic stockman: an engineer's pipedream or a genuine prospect?	414
5. The prospects for PLF – the need for automatic monitoring in livestock farming	416
6. Conclusions	418
References	418
Development of a risk assessment methodology for animal welfare in EFSA's scientific opinions	421
<i>D. Candiani, O. Ribó, S. Barbieri, A. Afonso, T. Grudnik, F. Berthe and J. Serratos</i>	
Abstract	421
1. Introduction	421
2. State of play of risk assessment in animal welfare	422
3. EFSA's methodology on the risk assessment in animal welfare	423
4. Discussion	430
5. Conclusions	431
References	431
A method for construction and evaluation of scenarios for sustainable animal production	433
<i>S. Gunnarsson, U. Sonesson, T. Nybrant, S. Stern and I. Öborn</i>	
Abstract	433
1. Introduction	433
2. Material and methods	434
3. Results and discussion	440
4. Conclusions	443
Acknowledgements	443
References	444

Scenarios for future Swedish dairy farming in relation to sustainability of animal health, environment and economy	445
<i>S. Gunnarsson, U. Sonesson, M. Stenberg and K-I. Kumm</i>	
Abstract	445
1. Introduction	445
2. Material and methods	446
3. Results	449
4. Discussion	454
5. Conclusion	456
Acknowledgements	456
References	456
Make the science knowledge available and used	459
<i>E. Szücs</i>	
Abstract	459
1. Introduction	459
2. Science and research	460
3. Education and training	465
4. Implementation of novel knowledge	470
Acknowledgements	472
References	472
A global vision	475
<i>P. Rafai</i>	
Abstract	475
1. Introduction	475
2. Major challenges for future agriculture	476
3. Options and strategies addressing the future development of animal agriculture	482
4. Genetic resources	482
5. The role of animal health	483
